Interim
Report

2018

CHARACTERISTICS OF THE GEM OF THE STOCK EXCHANGE OF HONG KONG LIMITED (THE "STOCK EXCHANGE")

GEM has been positioned as a market designed to accommodate companies to which a higher investment risk may be attached than other companies listed on the Stock Exchange. Prospective investors should be aware of the potential risks of investing in such companies and should make the decision to invest only after due and careful consideration. The greater risk profile and other characteristics of GEM mean that it is a market more suited to professional and other sophisticated investors.

Given the emerging nature of companies listed on GEM, there is a risk that securities traded on GEM may be more susceptible to high market volatility than securities traded on the Main Board of the Stock Exchange and no assurance is given that there will be a liquid market in the securities traded on GEM.

Hong Kong Exchanges and Clearing Limited and the Stock Exchange take no responsibility for the contents of this report, make no representation as to its accuracy or completeness and expressly disclaim any liability whatsoever for any loss howsoever arising from or in reliance upon the whole or any part of the contents of this report.

This report, for which the directors (the "Directors") of Biosino Bio-Technology and Science Incorporation (the "Company", together with its subsidiaries, the "Group") collectively and individually accept full responsibilities, includes particulars given in compliance with the Rules Governing the Listing of Securities on GEM (the "GEM Listing Rules") for the purpose of giving information with regard to the Company. The Directors, having made all reasonable enquiries, confirm that, to the best of their knowledge and belief: (1) the information contained in this report is accurate and complete in all material respects and not misleading or deceptive; and (2) there are no other matters the omission of which would make any statement herein or this report misleading.*

GROUP PROFILE

Biosino Bio-Technology and Science Incorporation (“Biosino Bio-Tec” or the “Company”) is the leading supplier of in-vitro diagnostic (“IVD”) reagents in the People’s Republic of China (“PRC” or “China”). The Company and its subsidiaries (collectively referred to as the “Group”) are principally engaged in the research and development, manufacturing, sale and distribution of IVD reagents products. It provides hospitals and other medical institutions with quality and reliable diagnostic reagents products.

The Company is strongly backed by prominent institutions and individuals: the largest shareholder is the Institute of Biophysics (“IBP”) of the Chinese Academy of Sciences (“CAS”), the leading research institution of life sciences in the PRC. The second largest shareholder is Mr. Chen Jintian, the Chairman of the Beijing Shuoze Health Industry Investment Company Limited (北京碩澤健康產業投資有限公司) (“Beijing Shuoze”); Beijing Shuoze is a professional medical and health industry investment and management company, its core businesses include medical and health industry investment management services, medical and health management consulting services, research and development of health foods and investment consulting services. The third largest shareholder, Beijing Enterprises Holdings Limited (“Beijing Enterprises”), is incorporated in Hong Kong and listed on the Main Board of the Stock Exchange (stock code: 0392). The third largest shareholder together with its subsidiaries are principally engaged in natural gas operations, brewery operations, sewage and water treatment operations as well as solid waste treatment operations in the PRC.

The Group’s “Biosino” brand is highly esteemed by industry peers and end-users of the medical sector. “Biosino” was awarded as a “Renowned Beijing Brand”(北京名牌產品) in 2002 and was awarded the “No. 1 Brand with High Quality and Reputation in the IVD Reagent Market of the PRC”(中國診斷試劑市場用戶滿意質量信譽第一品牌) in 2005. The Group adopts an integrated retail and distribution model in marketing. It has also established an efficient, stable and extensive sales network with more than 600 distributors, covering over 30 provinces, cities and autonomous regions in the PRC. The Group’s diagnostic reagents products are popular amongst domestic hospitals and medical institutions.

In addition, at the heart of Biosino Bio-Tec’s excellent reputation as a leading research hub and the long-term business development of the Group is the solid scientific or research background of the management, a number of the Group’s managers are professors and doctorate holders, some have even had research experience at IBP. The Group’s management is committed to upholding the principles of “By the people, for the people; advocating innovation; quality first; forging excellence and professionalism; moral integrity and compliance”, and strives to enhance the Group’s overall competitiveness.

H shares of the Company have been listed on the GEM since 27 February 2006.

MANAGEMENT DISCUSSION AND ANALYSIS

BUSINESS REVIEW FOR THE FIRST HALF OF 2018

At present, under the overall background of citizens' increasing awareness in disease prevention and health consciousness, as well as drug price reduction and removal of medicine markup policies, the medical treatment service will become the main income source for hospitals. The PRC has turned into an aged society and it is expected that with intensifying aging issue and improvement in people's health consciousness, total medical visits will maintain at a growth rate of over 5% in the next five years. It is also expected that medical expenditure per capita will maintain a growth rate of 5%-7%. With diagnosis as the first step of medical treatment and IVD as a foundation inspection and testing measure, about 30% of outpatient medical expenditure will be attributable to the clinical application of IVD products. With the advancement of the hierarchical medical system, the improved strength of the PRC enterprises in research and development and the increase in examination and testing volume in primary hospitals, under the combined influence of the medical insurance expense control policy and the need of "expense control" by hospitals, hospitals (especially those at the county level and below) will tend to use more domestic reagents, especially the biochemical diagnosis with relatively high price-performance, which will be beneficial to domestic reagent and instruments enterprises.

At present, the biochemical diagnostic reagent has become the most developed segment in IVD industry in the PRC, the overall technological standard has basically on par with current international standard, and product quality and independent innovation capacity has improved substantially. However, such segment industry recorded a flat growth which is expected to be lower than 10%, in which the key growth sector is at primary hospitals. As a result of the relatively low technological barrier of the biochemical reagent industry as well as the opening up of biochemical analyzers market, domestic enterprises entered the market by taking track and imitating foreign technologies and producing reagent products supporting imported biochemical analyzers, thereby forming a batch of sizable IVD enterprises which mainly manufacture biochemical reagents. Through the traceability of diagnostic products, the accuracy, consistency and comparability of examination and testing results were improved, the room of import substitution is continuously expanding, hence import substitution had basically completed and met the domestic hospital demand at all levels. However, the high-end biochemical analyzers are still dominated by foreign brands due to higher technological barriers. The characteristics of IVD industry is the focus of primary importance in determining the research and development of analyzers. Sales of analyzers can drive up high sales of reagents due to the resulted higher barrier in research and development of analyzers. The high-end instruments are mostly run in closed operation, that is, such instruments are only compatible with special reagents from specific manufacturers. As the quality of domestic biochemical diagnostic reagents are homogenized seriously, along with fierce price competition, the growth rate of the sales declined year by year. It is urgently necessary to increase our competitiveness with new technologies and new products. The research and development is the core competition barrier for IVD instrument and reagents.

MANAGEMENT DISCUSSION AND ANALYSIS

With the development of diagnostic technology, from the stages of screening, definite diagnosis to treatment, the diagnostic technology has begun to be professionally segmented. Research and development of new technologies and their applications, which include advanced diagnostic technology, treatment technology and health management platform have brought the changes. These changes will certainly generate significant impact on clinical diagnosis. In particular, attention should be focused on the effect on individualised diagnosis, represented by molecular diagnostic technology in the industry. Furthermore, attention should be paid to the commercial model among the industry, in particular, changes of marketing model. The emergence of several major domestic biochemical diagnostic companies is supported by strong sales channels and distributors, and their interests have been strengthened by way of capital ties and intensified bonding, which will become an important trend in market competition in the future.

RESEARCH AND DEVELOPMENT

During the reporting period, the Company applied two new patents in total, namely reagents kit testing *Klebsiella pneumoniae* and a kind of reagents kit of reduced coenzyme complex and its application. We renewed the registration of three products in total.

FINANCIAL REVIEW FOR THE FIRST HALF OF 2018

During the reporting period, the Group achieved a revenue of RMB146 million, representing an increase of 9.6% when compared with the same period last year. Profit attributable to the shareholders of the Company was RMB0.5 million, representing a decrease of 92.9% as compared with RMB7.3 million for the corresponding period last year. The decrease of profit was mainly due to (i) an increase in cost of sales due to a change in product mix; and (ii) an increase in administrative expenses for coping with the business and market expansion of the Group.

PROSPECT AND OUTLOOK

The IVD has become an increasingly important component of disease prevention, diagnosis and treatment for human, hence clinical medical examination and testing is the principal consumption direction for IVD reagents. In 2016, the global market size of IVD was US\$56.2 billion and over RMB60 billion in China. It is expected that the PRC will be the world's largest IVD market in 10 to 15 years' time. In the PRC, approximately 90% of IVD reagent products market is clustered at hospitals. They include 22,700 all-level hospitals, 37,200 town-level health centres and 450 blood stations, and also those emerging physical examination centres and independent medical laboratories. With increasing homogenization of diagnostic reagents, diversification in client selection and other changes, strong customer loyalty has become the key of enterprise differentiation and competitiveness. The traditional IVD manufacturing enterprises mainly focus on distribution. During the operating process, the agents have strong bargaining power. The "hierarchical medical system" and "dual-invoice system" which are being proactively pushed forward is certainly triggering a substantial change to operation channel, even business model, whereby leading to a significant change to business ecology in the industry. The agents with terminal resources become more important. At present, in the domestic IVD reagents market, biochemical diagnostic reagents and immune diagnostic reagents represented over 50% of total market size. Technically speaking, for the items broadly used in clinical application with vast market prospect (such as enzymes, lipids, liver function, blood glucose, urine test and immune reagent series in clinical biochemistry), the technological standard of domestic major manufacturers has basically reached current international level. The biochemical diagnostic market has the characteristics of higher demand and high stock level, relatively low in technology barrier and market concentration, so industry competition is increasingly fierce. However, the application of new technology and the development of new projects are far less active than the immune diagnosis and molecular diagnosis sectors. The enhancement in concentration and industrial chain reconstruction are two main drivers for key IVD enterprises (especially those engaging in clinical biochemical diagnosis) to achieve growth in future. The Company will pay close attention and take active measures to adapt to the changes to further strengthen the cooperation with downstream sectors through regional strategies tailored made to local conditions, with a view to improve its product sales volume or market share using diversified methods including consolidation.

MANAGEMENT DISCUSSION AND ANALYSIS

The gradual implementation of the new medical reform, medical insurance and health sector policies substantively benefit the pharmaceutical sector. In particular, the continuous influence of the medical reform has led to a steady increase in the number of domestic medical visits. The government encourages private capital investment in medical service industry, further improving the business sentiment and market environment of the industry. It is expected that as driven by social capital, the medical service market, in particular basic level medical market and high-end medical service, will increase substantially. The demand for diagnostic reagents and general consumables will continue to increase, which are beneficial to the continuous growth of the size of our business and will increase the sales of our products. However, with the gradual implementation of new medical reform, the charges of medical services begin to draw public attention. In terms of the criterion for medical service pricing issued for provinces and cities, reduction in the proportion of inspection fee and lowering inspection and testing pricing begins to take shape.

With increasing market participants, market competition for IVD reagent sector is becoming more and more intense. Enterprises are also facing on-going challenges in product quality enhancement and product-mix optimisation. With more stringent product registration and regulatory policies, drop-out rate of vulnerable companies and industry concentration rate will have an obvious increase. Under the adjustment and optimisation of the sales team, the Company will take more incentive measures to explore new marketing mode actively, continue intensifying its marketing efforts, accelerate the progress in research and development, launch new products and new instruments compatible with each other or with new functionalities one after another, increase its investment in immune diagnosis and molecular diagnosis, and strive to adapt to new market changes and new demand. In 2018, the Group will put emphasis on the “year of increasing income and reducing expenditure, quality, and entrepreneurship” activities, and pursue the spirit of “Unity, Regulated, Courage, Efficiency, Win-win”, initiate all employees to be proactive in establishing entrepreneurial awareness, enhancing occupation quality, improving product quality in all directions and means, and increasing the momentum in marketing efforts to increase the revenue of the Group and reduce unnecessary spendings in all directions and means. Through solidifying its business foundation and adjusting its operation directives and increasing income and reducing expenditure, the Group is striving to forge ahead under adverse conditions in order to become a respectable enterprise.

MANAGEMENT DISCUSSION AND ANALYSIS

CAPITAL STRUCTURE, FINANCIAL POSITION AND LIQUIDITY

The Group generally finances its operations with cash flows generated from sales, capital contributions from shareholders and bank borrowings. There was no new issue of shares and RMB129.63 million short-term bank borrowings were obtained during the period.

As at 30 June 2018, the Group had cash and bank balances of approximately RMB63.4 million (as at 31 December 2017: approximately RMB26.76 million). The Group had RMB78.94 million unsecured bank loans as at 30 June 2018 (as at 31 December 2017: RMB77.53 million).

FOREIGN CURRENCY RISK

The Group's businesses are mostly located in the PRC and most transactions are conducted in RMB, except that the Group occasionally purchases equipment and some in-vitro diagnostic reagent products from foreign countries for resale in the PRC and administrative expenses incurred by the Canadian subsidiary. Certain bank accounts denominated in Hong Kong dollars are in Hong Kong for the payments of H share dividends and miscellaneous expenses such as professional fees incurred in Hong Kong.

PLEDGE OF ASSETS OF THE GROUP

At 30 June 2018, all of the Group's buildings and prepaid land lease payments with net carrying amounts of approximately RMB28,297,000 and RMB2,693,000 respectively were pledged to Bank of Beijing, for bank loans granted to the Company with a principal of RMB70,000,000 as at the end of the reporting period.

At 30 June 2018, certain machinery with a net carrying amount of approximately RMB20 million were pledged to Far Eastern Leasing Co., Ltd. to serve a loan granted to the Company amounted to RMB27 million with duration of three years.

CONTINGENT LIABILITIES

As at the end of the reporting period, contingent liabilities not provided for in the financial statement were as follows:

	30 June 2018 RMB'000	31 December 2017 RMB'000
Guarantees given to a bank in connection with the loans granted to an associate	41,000	40,200

MANAGEMENT DISCUSSION AND ANALYSIS

EMPLOYEE

As at 30 June 2018, approximately 452 full-time employees (as at 31 December 2017: approximately 490) were employed by the Group. The total staff costs of the Group (including the directors' remunerations) for the six months ended 30 June 2018 amounted to approximately RMB37.92 million (2017: approximately RMB39.23 million). The Group determines and reviews the emoluments of its staff and the Directors based on their qualifications and experience, performance and market rates, so as to maintain the remuneration of its staff and the Directors at a competitive level. The Group participates in various defined contribution retirement plans and insurance schemes in compliance with its statutory obligations under the laws and regulations of China and Hong Kong. The Directors believe that employees are one of the most valuable assets of the Group who contribute significantly to the success of the Group. The Group recognises the importance of training of its staff and hence provides regular training for the Group's staff members to enhance their technical and product knowledge.

Other than the company secretary and qualified accountant, the employees of the Group are all stationed in China.

APPRECIATION

On behalf of the Board, I would like to extend my sincere thanks to all shareholders and business partners of the Group for their unwavering support, and to the entire staff of the Group for their valuable contribution.

By order of the Board
Biosino Bio-Technology and Science Incorporation
Wu Lebin
Chairman

Beijing, the PRC, 10 August 2018

NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

1. BASIS OF PREPARATION

The unaudited condensed consolidated financial statements for the three months and six months ended 30 June 2018 have been prepared in accordance with Hong Kong Financial Reporting Standards (“HKFRSs”) (which include all Hong Kong Financial Reporting Standards, Hong Kong Accounting Standards (“HKASs”) and Interpretations) issued by the Hong Kong Institute of Certified Public Accountants, accounting principles generally accepted in Hong Kong and the disclosure requirements of the Hong Kong Companies Ordinance. The accounting policies and basis of preparation used in the preparation of the unaudited condensed consolidated financial statements are consistent with those used in the Company’s audited financial statements for the year ended 31 December 2017.

2. OPERATING SEGMENT INFORMATION

For management purposes, starting from the year of 2017, the Group has two reportable operating segments:

- (a) the in-vitro diagnostic reagent products segment, which manufactures, sells and distributes a variety of mono/double diagnostic reagent products;
- (b) the property investment segment, which leases show rooms to smart home furniture sellers for its rental income.

Management monitors the results of the Group’s operating segments separately for the purpose of making decisions about resources allocation and performance assessment. Segment performance is evaluated based on reportable segment profit/loss, which is a measure of adjusted profit/loss before tax from continuing operations. The adjusted profit/loss before tax from continuing operations is measured consistently with the Group’s profit before tax from continuing operations except that interest income, finance costs, dividend income as well as head office and corporate expenses are excluded from such measurement.

Segment assets exclude deferred tax assets, tax recoverable, pledged deposits, cash and cash equivalents and other unallocated head office and corporate assets as these assets are managed on a group basis.

NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

2. OPERATING SEGMENT INFORMATION (CONTINUED)

Segment liabilities exclude derivative financial instruments, interest-bearing bank and other borrowings, an amount due to the ultimate holding company, tax payable, deferred tax liabilities and other unallocated head office and corporate liabilities as these liabilities are managed on a group basis.

Intersegment sales and transfers are transacted with reference to the selling prices used for sales made to third parties at the then prevailing market prices.

In 2018, the property investment segment was in start-up status and did not generate operation income. Therefore, all of the Group's revenue from external customers and profits was generated from the in-vitro diagnostic reagent products segment.

Period ended 30 June 2018

9. TRADE AND BILLS RECEIVABLES

Except for certain established customers of the Group which have been granted with payment terms ranging from two to four years in respect of certain sales of instruments, the credit periods of the Group granted to its customers generally range from 60 to 180 days. The Group closely monitors overdue balances, and impairment is made when it is considered that the amounts due may not be recovered. In view of the aforementioned and the fact that the Group's trade receivables relate to a large number of diversified customers, there is no significant concentration of credit risk. The Group does not hold any collateral or other credit enhancements over its trade receivable balances. The trade receivables are non-interest bearing.

An aged analysis of the trade receivables of the Group as at the balance sheet date based on invoice date, is as follows:
